

Ginger-Fair Trade

Spicy and soothing

While ginger certainly has a reputation for being spicy, this organic ginger tea is a bit milder than you might expect, with a nice pungency and a bit of ginger's sweet undertones. Used in China for at least two thousand years as a digestive aid, as well as to relieve nausea,* most cultures around the world have acquired fond feelings for ginger—both for its taste and for its soothing properties. We love this warming, spicy tea as a before or after meal treat, and for its ability to promote happy and healthy digestion.
