## Willamette Hops

One of the most widely grown aroma hops of the English Fuggle type, for flavouring use. Introduced in 1967, it has a pleasant mild fruity aroma with hints of spice and earthy woods. It is a seedless triploid with a vigorous growth habit. The cone structure is round and small to medium in size, and cones have a moderate amount of golden yellow lupulin. The variety has some resistance to diseases and pests.

Alpha acid 4-6%

Perennial (hardy in zones 3-8)
